

Task Solutions

1. How to set justify property in the paragraph elements?

You can justify paragraph text using CSS:

```
p {  
    text-align: justify;  
}
```

2. How to add shadow to text?

You can add shadow to text using the text-shadow property:

```
p {  
    text-shadow: 2px 2px 4px #000000;  
}
```

3. How to specify all the font properties in one declaration?

You can specify all font properties using the font shorthand property:

```
p {  
    font: italic small-caps bold 16px/2 cursive;  
}
```
